- ## How to do the calculations?

real measurements: $4.5\text{m} \times 5\text{m} \times 2.5\text{m} \rightarrow$ at peak 4m

or $1m = 5cm$ $\frac{5cm}{1m}$

8 Proportions Page 1

$$h_{\text{at peak}} \ 4\text{m} \Rightarrow 4\text{m} \times \frac{5\text{cm}}{1\text{m}} = 20\text{cm}$$

Finally
build
